\*Estimated exposure only includes population within the map area.

**Population Exposure**

**Structures**

Overall, the population in this region resides in structures that are vulnerable to earthquake shaking, though resistant structures exist. The predominant vulnerable building types are unreinforced brick with concrete floor and precast concrete frame with wall construction.

**Historical Earthquakes**

Date (UTC)	Dist. (km)	Mag.	Max MMI(#)	Shaking Deaths
1990-11-15	350	6.7	VIII(28k)	1
2002-11-02	332	7.2	VIII(2k)	3
2004-12-26	276	9.0	IX(237k)	1k

Recent earthquakes in this area have caused secondary hazards such as landslides that might have contributed to losses.
